GOLF CART MAINTENANCE – This is the perfect time for maintenance on your golf cart. Suggestions: Check the water level in your batteries. (*Add distilled water to your batteries*). Check the air pressure in your tires (tires should be inflated to 20 psi per tire). Inspect and clean the battery cables/terminals. (*Clean with an aerosol battery terminal cleaner or wire brush and rinse off with water, let dry, then apply an aerosol battery terminal sealer*). A little preventative maintenance may save you from missing an opportunity to play golf because your cart won't run. (The maintenance shed has an air compressor and air gauge and you are welcome to use them).

SAND BOTTLES - We have acquired some extra sand bottles for your golf carts. They are free of charge and you can pick one up at the #1 Senior tee box. Please take 1 and use it to fill divots on the tee boxes and in the fairways.

SOMETHING NEW ON THE COURSE - You will notice a new WHITE STAKE in front of each green on the course. This is put there to help protect the areas around the green from cart traffic. Please do not drive your golf cart beyond this white stake. Try to keep your golf cart on the cart paths around tee boxes when possible. DO YOUR PART to make YOUR golf course better! Please be careful not to drag your feet on greens
